Best of Faversham Market - Preston Street

The first and third Saturday of the month.

Mount Ephraim - Staple Street, Hernhill

Ten glorious acres of Edwardian terraced gardens.

Standard Quay - end of Abbey Street

For quay side shopping and refreshments.

Wherever you take your fur baby please be respectful and pick up after them.

FUN DOG FACTS

1. Dogs have sweat glands at the bottom of their paws (the paw pads). Hence, wetting their paws can help on a hot summer day.

2. When dogs howl at each other, they adjust the pitch of the howl to sound more unique.

3. In the dark, dogs use their whiskers to pick up subtle changes in the air currents. This gives them a better understanding of the environment and helps them 'see' better in the dark.

4. Despite popular belief, dogs don't only see in black and white. In fact, they can see in blue, green, yellow and grey too.

5. A dog's nose is always wet because it helps to absorb certain scents.

Furthermore, a dog will lick the nose to taste the scent.

6. The urine of a dog is acidic enough to corrode even metal. So, don't let them urinate on valuable things.

7. A dog can sense the earth's magnetic field. It's a big reason they're so effective at finding their way home.

8. The dog's nose print is so unique and detailed that it can be used to identify specific dogs. It's like our fingerprint.

9. They've been 'man's best friend' since over 33,000 years ago, when they first became domesticated by hunters and gatherers.

10. It's estimated that roughly 21% of all dogs snore in their sleep.
